SPECIAL CONSIDERATION: *This is a very large building, so knowing where you are going and the closest access point is very important. Be prepared to use extended hose lays to reach most points in this building. Ventilation and smoke removal of this building will be very difficult. There's no built-in means of smoke removal. An option will be to utilized numerous skylights as shown on the roof plan. (There is NO Stand Pipes in this building)*

SPECIAL CONSIDERATION: *Here again it's very important to know where you are going and the closest access point. There are no stand pipe connections on the second floor, so again be prepared to make long hose lays on the second floor from the stair wells. Again ventilation is going to be very difficult in this building because of fixed windows.*
